Two busy professionals needed more

flow between the rooms of this fourth floor inner-city condominium, hoping for an ultra-contemporary home that would provide comfort and efficiency. Custom cabinetry, fossilized limestone floors, stainless steel appliances and countertops, a glass tile bathroom and a poured concrete fireplace surround provide a nice contrast of building

materials. Skylights in the living room and master bedroom open the ceiling to the sky and new lighting fixtures gives an uncompromising ambiance. Maximizing storage, using easily maintained materials, and innovatively placing the modern equipment and systems created an uncluttered, carefree environment.
